

concardis Service Connector

All payment methods in one module

Whether on account, by credit card or Paypal - with the Concardis payment module you can cover all relevant payment methods and add further payment methods without technical effort.

Adapting your products to a specific market can be a challenge that involves a lot of complex processes. To successfully reach your target group, the following aspects are essential:

- Providing high-quality content in the local language and
- Offering a product selection that meets customer expectations.

However, it is often overlooked that every market and target group have their own payment preferences as well. Derived from that it becomes more and more important to offer a wide range of different payment methods. Subsequently, B2B and B2C scenarios are equally enriched with simplicity and convenience. This in turn instantly elevates the online shopping experience and is accompanied by increased customer satisfaction.

How to realize such a comprehensive payment solution? By integrating the Concardis Service Connector in your Intershop Commerce Management 7 system!

Based on the new Payment API for the current ICM 7.10 version, the connector adds Concardis payment methods, like Mastercard, American Express, PayPal, iDEAL, Alipay, WeChat Pay, and many more to your Intershop installation. The customizability of the Concardis Service Connector allows you to easily add further or to only show specific payment methods if additional conditions are met.

The services connector answers all questions of compliance with banks and regulations, scalability, performance, usability and security. At the same time your preferences are feasible in your Intershop Commerce Management. The best part: all your channels, B2B and B2C, benefit from these functionalities.

Benefits

- Part of Intershop's CaaS offering for customers with headquarters in EMEA.
- The connector is pre-integrated and configurable.
- Concardis realizes secure processing of payment transactions.
- Immediate access to all implemented and enabled payment methods.
- Possibility to gain access to more than 250 payment methods and finance service providers depending on the business case.
- Add further desired payment methods by concluding a contract with the corresponding collecting partner of Concardis.
- Concardis offers a full range of fraud prevention checks.
- Implementation of payment methods and functionalities in a cost-effective manner.
- By using the Concardis Payengine, the merchant easily obtains a PCI DSS SAQ-A status.

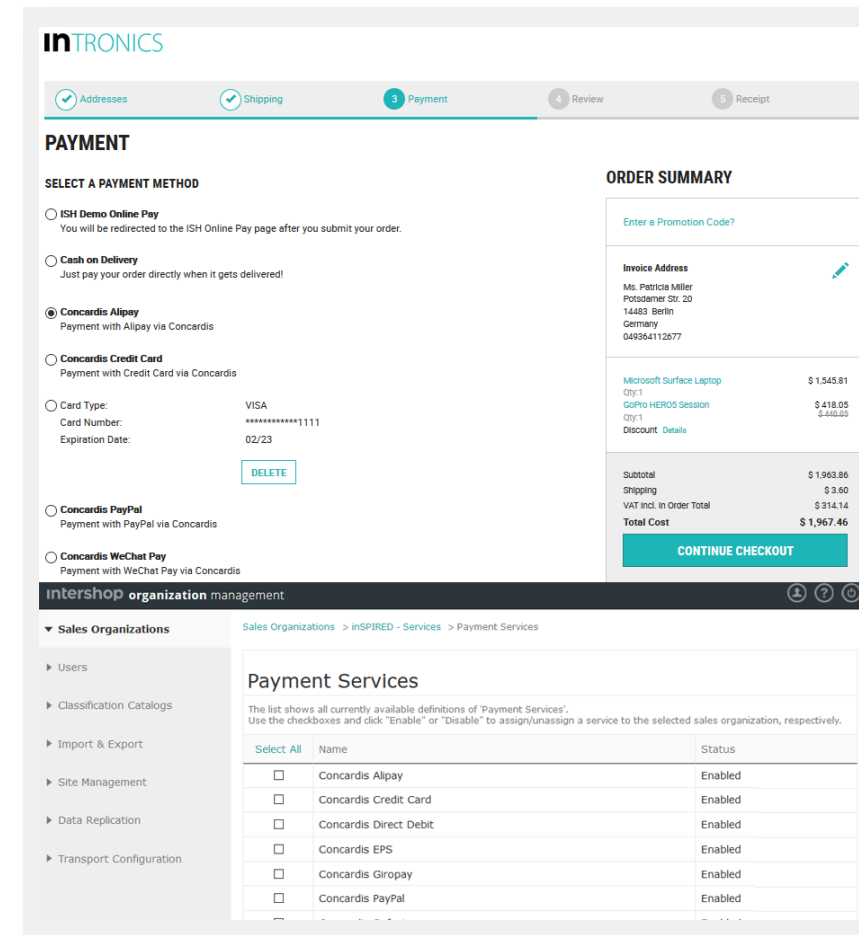

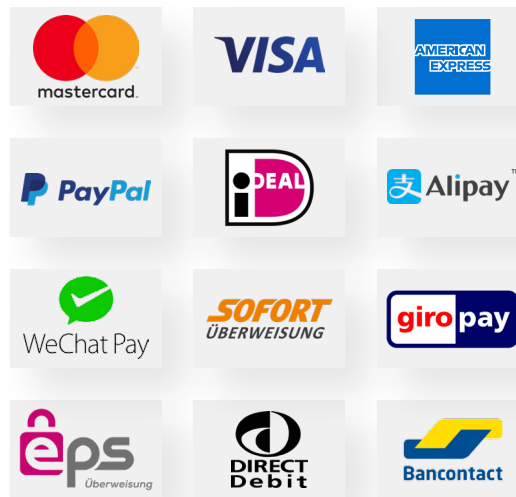

Worldwide Applicable: Add and Manage International Payment Methods

With the pre-integration of the Concardis Service Connector, the following payment methods are added to your Intershop Commerce Management 7 system by default:

- Credit Card payment including 3D Secure v2 enables your customers to pay with Visa, Mastercard, American Express, JCB and Diners Club. For payment transactions by credit card different payment management options are available:
 - **Capture** to request the settlement of the payment
 - **Cancel** to abort the transaction
 - **Refund** to return (parts of) the captured amount
- Online payment methods include EPS, iDEAL, GiroPay, PayPal, SEPA Direct Debit, Sofort, Alipay, WeChat Pay and Bancontact. In addition to the **Capture**, **Cancel** and **Refund** operations, online payment transactions can be managed in various ways, depending on the payment method:
 - **Auto Capture** to capture payments automatically after the authorization
 - **Reduce** to request a partial reduction of the authorized payment amount

Easy to Operate: Keep Your Payment Statuses up to Date

The link between Intershop Commerce Management and the Concardis Service Connector makes it easy to synchronize payment transactions. Therefore notifications are sent by Concardis to Intershop Commerce Management in order to update the payment status automatically. This then results in an update of the respective order.
